The BC Signs way of working

Four simple steps to a professional signage solution...

Survey

Our professionally trained staff will visit your site to conduct an extensive site assessment to ascertain your complete signage requirements. We will provide professional design solutions and recommendations accompanied by a competitive quotation.

Design

Whether you have a clear idea of what you require or wish for BC Signs to suggest options we can produce comprehensive designs along with marked up location plans to create your design solution.

Manufacture

At BC Signs we ensure a high quality solution. We manufacture signs to your approved design and deliver the best quality using the latest innovations in materials and technology.

Installation

Every sign is carefully installed on site to the highest quality and compliant to the latest standards. We provide statutory Risk Assessments and Method Statements as standard and all our installation teams are fully CSCS qualified in Health and Safety.
